COOK COUNTY MULTI-JURISDICTIONAL HAZARD MITIGATION PLAN VOLUME 2 - Municipal Annexes

Northbrook Annex

FINAL

July 2019

Prepared for:

Cook County
Department of Homeland Security and Emergency Management
69 W. Washington St., Suite 2600
Chicago, Illinois 60602

Toni Preckwinkle
President
Cook County Board of Commissioners

William Barnes
Executive Director
Cook County Department of Homeland
Security & Emergency Management

Jurisdiction Profile

The following is a summary of key information about the jurisdiction and its history:

- Date of Incorporation: 1901
- **Current Population:** 33,167 as of the 2018 U.S. Census population estimate.
- **Population Growth:** Based on the data tracked by the U.S. Census bureau, Northbrook has experienced a relatively flat rate of growth. From the year 2000 where the population was 33,435, to the year 2010 where the population was 33,170, the Village's size decreased less than 1%. However, the estimated 2018 population for the Village was 33,167 consistent with the stable population since 2010.
- Location and Description: The Village of Northbrook is 25 miles North of Chicago, 17 miles
 North of O'Hare Airport, 5 miles West of Lake Michigan. The Village is surrounded by four major
 highways and also utilizes Metra and Pace routes. Northbrook is 13 square miles, and contains
 14 public schools and 4 private schools, and 28 places of worship. Northbrook is bordered by
 Wheeling to the west, Deerfield and Highland Park to the North, Glencoe and Northfield to the
 east, and Glenview to the south.
- Brief History: The earliest recorded residents of the Northbrook area were the Potawatomi tribe. In 1833 the tribe ceded their land in Illinois and the Sherman family bought 159 acres in the northwest quarter of Section 10. This is the site of the Northbrook Central Business District. The town was originally named Shermerville after Mr. Frederick Schermer who donated the land for the first railroad station (Shermer Station and later Shermer Station). By the 1870s the region was a farm town with well-established brickyards. In 1901 following a close referendum, the town was incorporated as Shermerville with about 60 homes and 311 residents. By 1921, residents felt that the Shermerville name had a bad reputation, and the official name of Northbrook was adopted in 1923. At that time there were 500 residents. Northbrook did not grow rapidly until after World War II. In 1940, the population was 1,265, but by 1960 the population was 11,635. Another growth spurt was stimulated by the completion in 1963 of a water line to bring Lake Michigan water to Northbrook's new water treatment plant. By 1970 the population had more than doubled to 25,422.
- Climate: Northbrook's climate is typical of the Midwest, which is a humid continental climate. There are four strong seasons with warm to hot summers, cold and snowy winters, and rain in all seasons. Temperatures can rise or drop rapidly; winds can be extreme; and the flow of dry or moist hot air from the subtropics clashing with incoming air from the subarctic can produce deadly tornadoes. In winter, snowstorms can bring heavy lake effect snows to the area. Average summer temperatures are 76 °F with extremes in excess of 100 degrees, and average winter temperatures are 26 °F, with extremes in the negatives. The average annual rainfall is 33 inches, and snowfall is 39 inches.
- **Governing Body Format:** The Village has a Council-Manager form of government which was adopted in 1953 by referendum. The Board is made up of the Village President and six trustees. All are elected for four-year terms on an at-large basis. Also elected for a four-year term is the Village Clerk. The Village has 22 boards, commissions, and task forces, which report to the

- Village Board. This body of Government will assume the responsibility for the adoption and implementation of this plan. The Village operates the following departments: finance, fire, police, public works, building, development and planning services, and general government.
- Development Trends: Anticipated development levels for Northbrook are low to moderate, consisting of mostly residential development. Residential activity has seen an approximate annual increase of 15% since 2011, while commercial related development has remained relatively flat over the same timeframe. The majority of the development activity in the Village has been for residential additions and alterations. The Village of Northbrook adopted a comprehensive plan in December 2010. The comprehensive plan helps guide land use, transportation and economic development decisions for the Village. Future growth and development opportunities in the community will be managed as identified in plan. Through the development of the remaining vacant commercial land and redevelopment of existing industrial and commercial areas, Northbrook has positioned itself for future new and existing business growth. Northbrook is currently home for the headquarters of internationally known companies such as Underwriters Laboratories, Inc. and Crate & Barrel as well as home for hundreds of local and regional businesses.

Capability Assessment

The assessment of the jurisdiction's legal and regulatory capabilities is presented in the *Legal and Regulatory Capability Table* below. The assessment of the jurisdiction's fiscal capabilities is presented in the *Fiscal Capability Table* below. The assessment of the jurisdiction's administrative and technical capabilities is presented in the *Administrative and Technical Capability Table* below. Information on the community's National Flood Insurance Program (NFIP) compliance is presented in the *National Flood Insurance Program Compliance Table* below. Classifications under various community mitigation programs are presented in the *Community Classifications Table* below.

| TABLE: LEGAL AND REGULATORY CAPABILITY | | | | | |

|---|------------|---|--|--|
| Staff/Personnel Resources | Available? | Department/Agency/Position | | |
| Planners or engineers with knowledge of land development and land management practices | Yes | Director – Development/Planning Services Assistant Director – Development/Planning Services Senior Planner – Development/Planning Services Village Engineer – Public Works Project Manager – Public Works | | |
| Engineers or professionals trained in building or infrastructure construction practices | Yes | Village Engineer – Public Works Capital Projects Manager | | |
| Planners or engineers with an understanding of natural hazards | Yes | Village Engineer – Public Works Project Manager – Public Works | | |
| Staff with training in benefit/cost analysis | Yes | HR Manage | | |
| Surveyors | No | | | |
| Personnel skilled or trained in GIS applications | Yes | GIS Consortium (Municipal Government Partners) | | |
| Scientist familiar with natural hazards in local area | No | | | |
| Emergency manager | Yes | Fire Chief/Emergency Manager | | |
| Grant writers | Yes | Management Analysts in most departments | | |

| TABLE: NATIONAL FLOOD INSURANCE PROGRAM COMPLIANCE | | | |
|--|---|--|--|
| What department is responsible for floodplain management in your jurisdiction? | Public Works, Development/Planning Services | | |
| Who is your jurisdiction's floodplain administrator? (department/position) | Village Engineer/Public Works | | |
| Are any certified floodplain managers on staff in your jurisdiction? | Yes, Village Engineer | | |

| What is the date of adoption of your flood damage prevention ordinance? | Most recent amendments May 8, 2007 |
|---|--|
| When was the most recent Community Assistance Visit or Community Assistance Contact? | We have not received a Community Assistance Visit |
| Does your jurisdiction have any outstanding NFIP compliance violations that need to be addressed? If so, please state what they are. | None that we are aware of |
| Do your flood hazard maps adequately address the flood risk within your jurisdiction? (If no, please state why) | Yes |
| Does your floodplain management staff need any assistance or training to support its floodplain management program? If so, what type of assistance/training is needed? | Training and education is always welcomed. |
| Does your jurisdiction participate in the Community Rating System (CRS)? If so, is your jurisdiction seeking to improve its CRS Classification? If not, is your jurisdiction interested in joining the CRS program? | Yes, The most recent NFIP CRS Cycle visit occurred on September 10, 2013 |

| TABLE: COMMUNITY CLASSIFICATIONS | | | | | |
|--|-----|-------------------|----------|--|--|
| Participating? Classification Classification | | | | | |
| Community Rating System | Yes | Class 7 | 1995 | | |
| Building Code Effectiveness Grading Schedule | Yes | Unknown | N/A | | |
| Public Protection/ISO | Yes | ISO Class 1 | 7/1/2017 | | |
| StormReady | Yes | Gold (Countywide) | 2014 | | |
| Tree City USA | Yes | Participating | 1994 | | |

Jurisdiction-Specific Natural Hazard Event

The information provided below was solicited from the jurisdiction and supported by NOAA and other relevant data sources.

The *Natural Hazard Events Table* lists all past occurrences of natural hazards within the jurisdiction. Repetitive flood loss records are as follows:

- Number of FEMA-Identified Repetitive Loss Properties: 7
- Number of FEMA-Identified Severe Repetitive Loss Properties: 1
- Number of Repetitive Flood Loss/Severe Repetitive Loss Properties That Have Been Mitigated: 1

| TABLE: NATURAL HAZARD EVENTS | | | | | | |
|--------------------------------------|---------------------------------|------------|--|--|--|--|
| Type of Event | FEMA Disaster # (if applicable) | Date | Preliminary Damage Assessment / Event Narrative | | | |
| Winter Storm | | 2/5/2019 | 6.8 inches of snow in Northbrook. | | | |
| Severe Storms/Flooding | | 6/9/2018 | 2.36 inches of rain in Northbrook | | | |
| Severe Weather | - | 9/5/2014 | \$25,000 in property damage. | | | |
| Hail | - | 5/12/2014 | - | | | |
| Hail | • | 5/12/2014 | - | | | |
| Hail | - | 4/12/2014 | - | | | |
| Severe Weather/Wind | | 11/17/2013 | There were two reports of winds estimated to 70 mph near Northbrook. Tree tops were bent horizontally. | | | |
| Severe Storms/Flooding | DR-4116 | 4/26/2013 | \$22,695 | | | |
| Severe Storms/Flooding | | 7/23/2011 | In Northbrook, 5.33 inches of rain fell and four motorists had to be rescued from vehicles stranded in flood waters. | | | |
| Severe Winter Storm and Snowstorm | DR-1960 | 1/31/2011 | \$70,000 | | | |

| Winster Storm/Lake Effect Snow | | | 7.4 inches of snow in Northbrook |
|--|---------|------------|---|
| Severe Storms/Flooding | DR-1935 | 7/19/2010 | - |
| Severe Storms/Flooding | | 5/13/2010 | 2.58 inches of rain fell in Northbrook |
| Winter Storm | | 2/9/2010 | 13.2 inches of snow in Northbrook |
| Severe Storms/Flooding | DR-1800 | 9/13/2008 | In Northbrook, an overflowing stream flooded Green Park. |
| Winter Storm | | 3/21/2008 | 6.5 inches of snow in Northbrook |
| Winter Storm | | 12/5/2007 | 6.9 inches of snow in Northbrook |
| Severe Weather/Wind | | 9/25/2007 | More than 50 trees were snapped or damaged throughout Northbrook. |
| Severe Storms/Flooding | DR-1729 | 8/20/2007 | - |
| Severe Storms/Flooding | | 10/2/2006 | Edens Expressway closed near Willow Road from flooding, 2.74 inches of rain measured in Northbrook |
| Illinois Hurricane Katrina Evacuation | EM-3161 | 9/7/2005 | - |
| Hail | | 7/17/2003 | Tennis ball size hail was reported in Northbrook. |
| Wind | | 2/25/2001 | Wind damage at construction sites |
| Illinois Severe Winter Storm | EM-3134 | 12/11/2000 | - |
| Severe Weather/Wind | | 5/18/2000 | Windows were blown out at the Allstate Insurance building in Northbrook. |
| Illinois Winter Snow Storm | EM-3068 | 1/1/1999 | - |
| Severe Weather/Wind | | 6/18/1998 | The gym roof at Field School in Northbrook was peeled off |
| Flooding | DR-1188 | 8/16/1997 | - |

| Flooding | DR-1129 | 7/17/1996 | - |

| Illinois Blizzards and Snowstorms | EM-3068 | 1/16/1979 | - |

Jurisdiction-Specific Hazards and Impacts

Hazards that represent a county-wide risk are addressed in the Risk Assessment section of the 2019 Cook County Multi-Jurisdictional Hazard Mitigation Plan Update. This section only addresses the hazards and their associated impacts that are **relevant** and **unique** to the municipality.

Flood: Our flood-prone areas are identified in our Master Stormwater Management Plan.

Wind and Tornado: Wind, especially in conjunction with thunderstorms, has done considerable damage in the area.

Severe Cold and Winter Storms: Snowfall can reach high levels during storms in the area. In addition to winter storms, lake effect snow can impact the area.

Hazard Risk Ranking

The *Hazard Risk Ranking Table* below presents the ranking of the hazards of concern. Hazard area extent and location maps are included at the end of this chapter. These maps are based on the best available data at the time of the preparation of this plan, and are considered to be adequate for planning purposes.

| | TABLE: HAZARD RISK RANKING | | | | | | |
|------|----------------------------|---|--|--|--|--|--|
| Rank | Hazard Type | Risk Rating Score (Probability x Impact) | | | | | |
| 1 | Severe Weather | 54 | | | | | |
| 2 | Severe Winter Weather | 54 | | | | | |
| 3 | Earthquake | 32 | | | | | |
| 4 | Tornado | 21 | | | | | |
| 5 | Flood | 18 | | | | | |
| 6 | Dam Failure | 3 | | | | | |
| 7 | Drought | 2 | | | | | |

Mitigation Strategies and Actions

The heart of the mitigation plan is the mitigation strategy, which serves as the long-term blueprint for reducing the potential losses identified in the risk assessment. The mitigation strategy describes how the community will accomplish the overall purpose, or mission, of the planning process. In this section, mitigation actions/projects were updated/amended, identified, evaluated, and prioritized. This section is organized as follows:

- New Mitigation Actions New actions identified during this 2019 update process
- Ongoing Mitigation Actions Ongoing actions with no definitive end or that are still in progress.
 During the 2019 update, these "ongoing" mitigation actions and projects were modified and/or amended, as needed.
- Completed Mitigation Actions An archive of all identified and completed projects, including completed actions since 2014.

The Hazard Mitigation Action Plan Matrix Table below lists the actions that make up the jurisdiction's hazard mitigation plan. The Mitigation Strategy Priority Schedule Table identifies the priority for each action.

| TABLE: HAZARD MITIGATION ACTION PLAN MATRIX | | | | | | | |
|---|-----------------------------|--------------------|-----------------------|------------------------------|---------------|---|--|
| Status | Hazards Mitigated | | | Lead Estimated Agencies Cost | | Timeline/Projected Completion Date (a) | |
| | .1—Integrate within the jur | | tigation plan int | o other plans | , ordinances, | or programs to dictate | |
| Ongoing | All | 3, 4, 6, 10, 13 | Fire, Public Works | Low | Local | Ongoing | |
| Action N3. | . 2 —Update th | ne municipality | y's emergency o | perations cen | iter | | |
| Ongoing | All | 1, 2, 5, 8 | Fire | Low | Local | Short-term | |
| Action N3. | .3—Increase | capability for s | now removal. | | | | |
| Ongoing Winter Weather Under Weather Femal Public Works High Femal Hazard Mitigation Grant Funds Funds | | | | | | Long-term | |
| Action N3.4—Strive to capture perishable data after significant hazard events to support future updates to the risk assessment of this plan | | | | | | | |

| Ongoing | All | 3, 6, 8 | Planning, Public Works | High | General revenue, FEMA Grants | Long-term and ongoing | |
|--|---|---------------------------|---------------------------|-------------------|---------------------------------------|-----------------------|--|
| Action N3.5 —Maintain good standing under the National Flood Insurance Program by implementing programs that meet or exceed the minimum NFIP requirements. Such programs include enforcing an adopted flood damage prevention ordinance, participating in floodplain mapping updates, and providing public assistance and information on floodplain requirements and impacts. | | | | | | | |
| Ongoing | Flood | 3, 4, 6, 7, 9 | Planning, Public Works | Low | Local | Ongoing | |
| Action N3. | 6 —Consider | the developm | ent of a post-dis | saster action p | olan, including | g a debris management | |
| Ongoing | All | 1, 6, 8 | Public Works | Low | Local | Long-term | |

New Mitigation Actions

The following are new mitigation actions created during the 2019 update.

| Mitigation Action | Implement Blackthorne Lane Stormwater Project- Improve street drainage collection |
|--|---|
| | system |
| Year Initiated | 2019 |
| Applicable Jurisdiction | Northbrook |
| Lead Agency/Organization | Northbrook |
| Supporting Agencies/Organizations | |
| Applicable Goal | Protect the lives, health, safety, and property of the citizens of Cook County from the impacts of natural hazards. |
| Applicable Objective | Increase the resilience of (or protect and maintain) infrastructure and critical facilities. Consider the impacts of natural hazards on future land uses in the planning area, including possible impacts from climate change. Integrate hazard mitigation policies into land use plans in the planning area. Reduce natural hazard-related risks and vulnerability to potentially isolated populations within the planning area. Encourage hazard mitigation measures that result in the least adverse effect on the natural environment and that use natural processes. |
| Potential Funding Source | Bonds |
| Estimated Cost | \$263,000 |
| Benefits (loss avoided) | Reduces structure and property flooding |
| Projected Completion Date | October 2019 |
| Priority and Level of Importance (Low, Medium, High) | Medium Priority |
| Benefit Analysis (Low, Medium, High) | Medium – Project will have a long-term impact on the reduction of risk exposure for life and property, or project will provide an immediate reduction in the risk exposure for property. |
| Cost Analysis (Low, Medium, High) | Low – The project could be funded under the existing budget. The project is part of or can be part of an ongoing existing program. |
| Actual Completion Date | |

Recommended Mitigation Action/Implementation Plan and Project Description

Plan and Project **Description:**

This project involves replacing the existing drainage system at and near the Action/Implementation intersection of Williamsburg Drive and Old Post Road. A flood overflow relief storm sewer will be constructed from Old Post to the Revere Drive Basin on new drainage easements. This project will also involve improvements to the inlets on the cul-de-sac on Old Post.

|------------------------|--|

Recommended Mitigation Action/Implementation Plan and Project Description

Action/Implementation Plan and Project Description:

This project involves supplementing the existing 42-inch storm sewer by constructing approximately 375 feet of 48-inch storm sewer to drain the low area on Brittany Road to the 48-inch storm sewer outlet on Bordeaux Road. The lower inlets within the flood prone area will be disconnected from the existing storm sewer and reconnected to the 48-inch storm sewer. The inflow capacity will be increased by adding inlets. A downstream control structure will be constructed. Currently, this area experiences street, front yard and reported structure flooding.

Recommended Mitigation Action/Implementation Plan and Project Description

Action/Implementation Plan and Project Description:

This project involves improving conveyance by replacing damaged culverts and regrading the ditches along Dehne and Brentwood Roads. The project will also improve collection capacity through the installation of inlets along Brentwood Road and replacement of the existing 15-inch storm sewer from Penfold Place to Summerton Place. Currently, this area experiences front yard, rear yard and street flooding with water flowing across Dehne Road.

Recommended Mitigation Action/Implementation Plan and Project Description

Action/Implementation Plan and Project Description:

This project involves construction of a relief sewer from the First Street/Center Avenue intersection along First Street to the Village Hall/Library Campus detention facility. As part of this project, the Center Avenue storm sewer will be disconnected from the First Street southern outlet. Additionally, a new low flow storm sewer will be constructed and connected to the First Street storm sewer with an acquired easement to reduce backyard flooding. Finally, the project will help mitigate downstream impacts by oversizing the installation of the relief sewer.

Recommended Mitigation Action/Implementation Plan and Project Description

Action/Implementation Plan and Project Description:

The culvert under Second Street is a corrugated metal pipe structure that allows stormwater to flow from the Techny Drain underneath the roadway. The culvert has begun to show signs of degradation and is in need of replacement. This project also includes replacing an existing pipe to the east of the culvert with a new, improved design and returning the area to the west to an open channel with native plantings.

Recommended Mitigation Action/Implementation Plan and Project Description

Plan and Project Description:

This project involves constructing stormwater improvements at the Surrey Lane cul-de-sac, including a conveyance storm sewer from the cul-de-sac to the Lee Road existing storm sewer and a low/flood overflow structure at the Action/Implementation east side of the Surrey Lane cul-de-sac with a restrictor plate. Also, a relief swale will be constructed within the drainage easement. Two inlets will be added within the cul-de-sac area to improve drainage. A short segment of the Lee Road storm sewer system will be modified to accommodate the new storm sewer and flood overflow path. Currently, this area experiences cul-desac, front yard and rear yard flooding.
